First Quarterly Report
2015

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.

The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors. Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors (the “Directors”) of Glory Flame Holdings Limited (the “Company”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM of the Stock Exchange (the “GEM Listing Rules”) for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that to the best of their knowledge and belief the information contained in this report is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this report misleading.

MANAGEMENT DISCUSSION AND ANALYSIS

FINANCIAL REVIEW

Revenue

During the Reporting Period, all of our Group's revenue was derived from concrete demolition service rendered to the Group's customers and was generated in Hong Kong. The Group's revenue for the Reporting Period was approximately HK\$17.9 million, representing a decrease of approximately 13.8% from the corresponding period of last year (2014: approximately HK\$20.8 million). The decrease in the Group's revenue was mainly due to, among other factors, the increasing price competition in certain concrete demolition jobs and the delay of certain projects of some of the Group's customers.

Cost of Sales

The Group's cost of sales increased from approximately HK\$11.3 million for the three months ended 31 March 2014 to approximately HK\$14.1 million for the Reporting Period, representing an increase of approximately 24.5%. Such increase was mainly attributable to the increases in the Group's subcontracting, staff costs, and depreciation and transportation expenses. In particular, the substantial increase in the subcontracting costs incurred by the Group during the Reporting Period was due to, among other factors, long holidays taken by the Group's own labours during the Christmas/New Year and the Chinese New Year periods in the first quarter of 2015, resulting in the Group having to rely more than it usually does in the first quarter of the year on services from subcontractors, who, however, might have also experienced similar problems of long holidays taken by their own labours during the Christmas/New Year and the Chinese New Year periods, which in turn led to subcontractors' increases in prices.

Gross Profit

The Group's gross profit amounted to approximately HK\$3.8 million for the Reporting Period, representing a decrease of approximately 59.8%, as compared with approximately HK\$9.5 million for the three months ended 31 March 2014 as a result of the simultaneous occurrence of the factors in the Reporting Period leading to the decline in the Group's revenue and the increase in cost of sales as discussed above.

Other Income and Net Gains

The Group's other income and net gains amounted to approximately HK\$202,000 for the Reporting Period, representing an increase of approximately 6,633.3% as compared with approximately HK\$3,000 for the three months ended 31 March 2014, which was primarily due to the receipt of the government grants in relation to the phasing out of pre-Euro IV diesel commercial vehicles.

Administrative and Other Operating Expenses

The Group's general and administrative expenses amounted to approximately HK\$4.3 million for the Reporting Period, representing a decrease of approximately 24.2% as compared with approximately HK\$5.7 million for the three months ended 31 March 2014. Such decrease was the net result of (1) the listing expenses of approximately HK\$2.2 million incurred during the three months ended 31 March 2014 which was non-recurring in the Reporting Period; (2) the saving in operating lease on premises and depreciation of assets under finance lease; and (3) the increase in staff cost and directors' emoluments, depreciation of self-owned assets, auditor's remuneration and professional fees, and other expenses.

Finance Costs

For the Reporting Period, the Group's finance costs amounted to approximately HK\$25,000, representing a decrease of approximately 75.2% as compared with approximately HK\$102,000 for the three months ended 31 March 2014. Such decrease was mainly due to the settlement of certain finance lease facilities and bank borrowings with the listing proceeds, thus reducing the respective finance costs.

Income Tax Expenses

For the Reporting Period, the Group's income tax expenses amounted to approximately HK\$138,000, representing a decrease of approximately 86.2% as compared with approximately HK\$1.0 million for the three months ended 31 March 2014. Such decrease was primarily due to the listing expenses of approximately HK\$2.2 million incurred in the three months ended 31 March 2014 (2015: nil) which were not deductible for tax purposes.

(Loss)/Profit for the Reporting Period

As a result of the foregoing and in particular the decrease in revenue and increase in cost of sales as discussed above, the Group's operation for the Reporting Period recorded a net loss of approximately HK\$452,000 (2014: net profit of approximately HK\$2.7 million).

BUSINESS REVIEW AND OUTLOOK

The principal activity of the Company is investment holding. The Group's principal activities are the provision of concrete demolition service in Hong Kong as a subcontractor. The Group's concrete demolition services are mainly concerned with the removal of pieces or sections of concrete from concrete structures by applying a variety of methods, such as core drilling, sawing, bursting and crushing, etc. During the Reporting Period, all of the Group's revenue was derived from our concrete demolition services rendered to customers in Hong Kong.

Concrete demolition industry is one of the specific areas of the construction industry in Hong Kong, which mainly involves core drilling, sawing, bursting and crushing, and surface preparation. Concrete demolition services are usually functions performed by subcontractors in (i) general building works, especially for alteration and redevelopment project; and (ii) civil engineering works. Concrete demolition work can be applied in various situations, such as the construction of underground utilities, creation of openings for elevator, door, and window installation, redevelopment of buildings, roads, tunnels and underground facilities, removal of concrete during building construction, and the preparation of road surfaces.

We believe that we have several business strengths and competitive advantages that set us apart from our rivals and enable us to continue our growth and enhance our profitability. Such strengths and competitive advantages include (1) 33 years of presence and well-established reputation in the concrete demolition industry in Hong Kong; (2) possession of dedicated and proficient labour force coupled with a variety of cutting-edged concrete demolition machinery; and (3) experienced in-house repair and maintain mechanics to get the work done well, right, and quick.

The rapid development for railway and highway infrastructure in Hong Kong presents promising opportunities for the concrete demolition industry, primarily because concrete-based structures such as rails, bridges and tunnels have to be molded or modified by way of excavating concretes. Therefore, the rising number of transportation networks will continue to drive the concrete demolition industry in Hong Kong. In view of the above, there are positive prospects for our Group. However, the simultaneous occurrence of the increase in subcontracting costs during holiday seasons in the first quarter of 2015 coupled with, among other things, price competition in certain concrete demolition jobs, affected our profitability for the first quarter of 2015. As a result, the Group recorded a loss of approximately HK\$452,000 for the Reporting Period (2014: net profit of approximately HK\$2.7 million). The Group will continue to monitor the situation closely and seek to optimize our business strengths and competitive advantages wherever possible.
